

# Marching

Focus on power

ENGLISH

**MARCHING**

Building on the success of the Custom Brass Series, Adams craftsmen have created a line of horns that surpasses the performance and endurance of all others. The Adams Marching Brass Series has been created to elevate performance by delivering the finest quality instruments with the endurance to withstand the demands of modern marching competition. The Marching Brass Series is designed, crafted, and assembled entirely in The Netherlands combining traditional techniques with the latest manufacturing methods to deliver superb instruments.

Only the highest quality materials have been used in the creation of these well balanced and lightweight horns, resulting in a product line that players and directors agree has the greatest sound quality on the field. Proprietary valves are produced with precision cut stainless steel pistons for quick response and years of performance. Custom made durable bracing for strength with attention to ergonomic hand positions, line of sight windows, and a comfortable balance.

Adams Marching Brass will elevate your performance with superb intonation, clear projection, enormous power, superior resonance and powerfully projected sound – exactly the qualities demanded by every critical musician on and off the field.

MATERIALS  FINISHES  

A finely crafted instrument with a bright cutting tone and fast valve performance from the stainless steel pistons. Hand-lapped valves and precision fit slides ensure even resistance throughout the range. With a full 250 mm bell, the Adams Marching Mellophone delivers a full tone while still being well balanced at only 1.5 kg.

The Adams Marching Baritone features a compact wrap design that allows the player to easily maneuver and perform with a full, powerful tone. Only the highest quality tubing is used in the pressure formed Adams Marching Brass series. Durable strong bracing is used on every Adams horn, giving this instrument the endurance that modern marching performance requires. Hand lapped valves and proprietary stainless steel pistons provide an airtight seal for an even resistance throughout the range. Lightweight and comfortably balanced design with a 255 mm bell for full projection.
